PROFESSIONAL EXPERIENCE

Quantum3 Labs Pte. Ltd	2024.01 - Present
Frontend + UI/UX Intern	Singapore
<ul style="list-style-type: none">Responsible for using the Apollo Client library to construct and maintain GraphQL queries with parameters, utilizing useQuery to share the returned data objects with custom UI components.Optimized API calls and data management by wrapping custom hooks with TanStack Query, ensuring efficient data retrieval and cache management through configuration of query keys, query functions, enable states, and data expiration settings.Migrated Web3 libraries (Wagmi, Viem, RainbowKit, TanStack Query) from older versions to the latest versions, ensuring improved performance and functionality.Implemented and maintained API endpoints in NestJS to support user subscription features on the official website, and integrated an email service to send subscription information to users' email addresses.Participated in the development and prototyping process for the company's official website and DeFi lending platform, flexibly switching between multiple active projects, and contributed to the Starknet Onlydust community.	
Beijing KingLead Education Technology Co., Ltd.	2023.12 - 2024.01
Frontend Intern	China
<ul style="list-style-type: none">Utilized PHP and HTML to implement dynamic page integration, developed efficient and responsive official website pages based on UI prototype designs, and deployed the updated pages to the server.	
Beijing Zhongjia Interactive Entertainment Co., Ltd.,	2022.05 - 2023.05
Uniapp Front-End Intern	China
<ul style="list-style-type: none">Responsible for developing and maintaining the frontend of a WeChat mini-program for Murder Mystery games, designed reusable components using Vue.js, implemented responsive UI with the uView UI component library and TailwindCSS framework, and provided a smooth pull-to-refresh and scrolling experience through third-party libraries like mescroll-uni.Encapsulated HTTP requests compatible with the uni.request environment, supporting configuration management, interceptors, platform-specific features, and file operations; managed user login states and notification settings through Vuex and persisted these settings via local storage.Used the Vue Vben Admin frontend framework to refactor and migrate the internal management system from Vue2 to Vue3, completed data interaction with the backend, and provided access permissions for administrators and regular employees based on user roles.	

PROJECT EXPERIENCE

Stormbit – P2P Lending Platform	2024.02 - 2024.07
Github: https://github.com/Quantum3-Labs/stormbit-ui	
Stormbit is an advanced peer-to-peer lending platform that seamlessly integrates traditional financial systems with innovative cryptocurrency markets. Utilizing blockchain technology, Stormbit offers unique lending options such as undercollateralized, NFT-backed, and fully customizable loans.	
Tech Stack: React, Next.js, TypeScript, TailwindCSS, Hardhat, Solidity	
RateCorner – NUS Course Evaluation Website	2024.02 - 2024.06
Website Link: https://ratecorner.org/	

We developed a course evaluation platform for NUS students to freely publish, browse, and manage course evaluation. This helps current students gain a more comprehensive understanding of their department's course information and evaluations from former students, enabling them to select courses that better fit their interests and career development.

Tech Stack: React, TypeScript, TailwindCSS, Java, MySQL

FootyDAO – Web3 football event APP

2023.08 - 2023.12

Website Link: <https://footydao.xyz/>

We developed a mobile and web application with React and Tailwind CSS which enables cryptocurrency users to participate in football games organized by FootyDAO at various Ethereum conferences worldwide. To enhance the user experience on the website, we provide opportunities for engagement, user can also explore and stay up-to-date with the latest football events, including upcoming matches

Tech Stack: React, Next.js, TypeScript, Foundry

SKILLS LIST

HTML5, CSS3, Javascript, Typescript, Vue.js, React, Next.js, Java, Python, PostgreSQL, MySQL, Nest.js, UI/UX, Figma, Adobe Photoshop, Adobe Illustrator
